Profile

Front-end Developer with 3+ years building responsive, performant web applications using React, JavaScript, and Bootstrap. Experienced in building modular UI components, client-side form validation, authentication flows, and API-driven interfaces.

Employment History

Mid-Level Frontend Developer – Tamkeen Tech Solutions (Jan 2024 – Present)

Damascus, Syria

- Develop and maintain high-performance web applications using React JS and Bootstrap.
- Write clean, modular JavaScript and CSS.
- Build interactive features such as toast notifications and client-side validation.

Frontend Engineer – Syrian Esports Association (SESA) (Oct 2022 – Dec 2023)

Damascus, Syria

- Engineered a comprehensive blogging platform using React Router.
- Built article creation interfaces with multimedia uploads and API integration.
- Implemented authentication components and responsive layouts using Bootstrap.

Web UI Developer – Freelance / Technical Services (Sep 2020 – Sep 2022)

Damascus, Syria

- Designed and implemented responsive web layouts using HTML, CSS, and Bootstrap.
- Leveraged JavaScript fundamentals to add interactivity to static web pages.
- Translated stakeholder requirements into detailed event-driven web plans and schedules.
- Managed project timelines and deliverables while ensuring high-quality frontend output.
